Project :

Field(s)	Contemporary Music, multimedia/interdisziplinäre approach
Description	<p>The 2-year project aims to collect folk songs from the fringing »margins«, the border regions of Europe. Because there, where Europe apparently comes to an end, is where the universal language of music is ideal to vividly report on the strength of the historical and contemporary connections between the people in Europe and the mutual values and goals that emerge from these bonds.</p> <p>The goal of the project is to use the collected folk songs as a source of inspiration and as the creative foundation for the transnational production of an innovative, staged concert with a contemporary composition by Marc Sinan.</p> <p>The performances will take place in each participating country – the core instrumentation will consist of 2 musicians from each of the 4-5 participating European ensembles and will be accompanied by extraordinary folk singers and vocalists. The rest of the performing orchestra will be members from the "hosting" ensemble.</p>
